SUMMARY

Senior AI-Driven Automation Engineer | QA Automation Architect | Healthcare Domain Expert | Flutter & Full-Stack Developer with 7+ years of experience in Healthcare Technology, Automation Architecture, API Testing, Performance Engineering, Mobile Application Development, and AI-Assisted Testing. Proven expertise in building scalable automation frameworks, reducing regression cycles, validating enterprise healthcare platforms, and delivering production-grade Flutter applications. Experienced across Healthcare Portals, Patient Engagement Platforms, Medical Data Processing Systems, AI Infrastructure Projects, and Full-Stack Development initiatives.

EXPERIENCE

Senior AI-Driven Automation Engineer May 2025 – Present

HBox.ai (QHbox India Pvt Ltd – Bengaluru) *Bengaluru, India*

Responsibilities

- Design, develop, and maintain scalable automation frameworks for enterprise healthcare applications.
- Lead automation initiatives across Healthcare Portal, Patient Engagement Platform, and Medical Database ETL Platform.
- Perform exploratory, functional, integration, API, and regression testing.
- Collaborate with product managers, developers, and stakeholders to improve product quality and release confidence.
- Support CI/CD validation and production release readiness.
- Research and prototype AI-assisted testing concepts for healthcare environments.
- Built and maintained the Healthcare Portal Automation Framework using Python, Selenium, Behave, Jenkins, and Allure.
- Built and maintained the NG PEP Automation Framework supporting patient onboarding, appointments, dashboards, workflow management, user administration, and API validation.
- Built and maintained the NG PEP v2 Automation Framework covering patient groups, activities, tasks, appointments, facility availability, and healthcare workflows.
- Automated 500+ regression scenarios across multiple healthcare products and dashboards.
- Reduced regression execution cycles from multiple days to under 10 hours.
- Supported 5+ production releases per month.
- Contributed to healthcare systems serving 15,000+ users.
- Participated in quality assurance and validation of the Medical Database ETL Platform integrating Epic, Athena Health, NextGen, DrChrono, and CGM APRIMA healthcare systems.
- Actively researching AI-assisted testing concepts involving requirement decomposition, autonomous exploration, vector memory, and self-healing automation approaches.
- Products Worked On: Healthcare Portal; Patient Engagement Platform (NG PEP); Patient Engagement Platform v2 (NG PEP v2); Medical Database ETL Platform

Senior SQA Engineer March 2019 – May 2025
Omnicuris *Bengaluru, India*

Responsibilities

- Led automation initiatives across healthcare learning and engagement platforms.
- Progressed from Software Test Engineer (Mar 2019 – Apr 2022) to Senior SQA Engineer (Apr 2022 – May 2025).
- Designed and maintained automation frameworks for web and API testing.
- Developed Karate DSL-based API automation solutions.
- Executed functional, integration, performance, regression, and exploratory testing activities.
- Conducted performance benchmarking using JMeter and Taurus.
- Mentored team members on automation architecture and testing best practices.
- Supported production releases and healthcare application quality initiatives.
- Scaled Behave-based automation frameworks across multiple healthcare products.
- Expanded automation coverage across microservice-driven healthcare applications.
- Reduced manual regression effort through systematic automation adoption.
- Improved framework maintainability, reusability, and reporting capabilities.
- Contributed to healthcare education platforms used by medical professionals worldwide.
- Product Contribution - Escape Omni Game: Contributed to a Flutter-based medical educational gaming platform.
- Product Contribution - Escape Omni Game: Supported authentication, multimedia content delivery, learning workflows, and progress tracking features.

PROJECTS

AI Weather — Founder & Developer

- Designed, developed, tested, published, and actively maintain a Flutter-based weather application available on Google Play Store.
- Implemented weather forecasting, AQI monitoring, Firebase integrations, analytics, notifications, and production deployment workflows.
- Responsible for complete product lifecycle including architecture, development, testing, release management, and maintenance.

Project Agent Memory

- Developed and run in daily use an MCP server that gives coding agents persistent project memory.
- Implemented semantic search, context retention, knowledge linking, memory management, and vector search capabilities.
- Built 8 MCP tools using Qdrant or PostgreSQL/pgvector with local embeddings; open source on GitHub.

Indian Neighbour — Contract Flutter Developer

- Independently delivered a production Flutter application within approximately 40 days.
- Built authentication, community networking, messaging, media sharing, notifications, and user engagement features.
- Published on Google Play Store and Apple App Store.
- Achieved 10,000+ installs and continues operating successfully in production.

Envy — Contract Flutter Developer

- Developed a community-focused social and event platform featuring authentication, profile management, event creation, invitations, messaging, and notification systems.
- Integrated Google Sign-In, Apple Sign-In, Phone OTP authentication, and Firebase services.
- Delivered a production-ready cross-platform mobile application.

Mission Control (Release v2.0.2)

- Contributed Session Key Prefix UI feature merged into public release via PR #85.
- Implemented configurable session routing, inheritance mechanisms, and priority-based resolution for AI-agent workflows.
- Enhanced OpenClaw session management capabilities within a public AI-agent orchestration platform.

TECHNICAL SKILLS

Programming Languages: Python | Dart | TypeScript | JavaScript | SQL

QA Automation & Testing: Selenium WebDriver | Playwright | Behave BDD | Karate DSL | API Testing | Functional Testing | Integration Testing | Regression Testing | Exploratory Testing | Performance Testing | JMeter | Taurus | Allure Reporting | Test Architecture

Mobile Development: Flutter | Firebase Authentication | Firestore | Firebase Storage | Firebase Messaging | Firebase Analytics | Crashlytics | Google Play Console | Apple App Store Deployment

Backend & Full Stack: FastAPI | React | REST APIs | JWT Authentication | Pandas | OpenPyXL | Node.js | ETL Processing **AI & Agent Systems:** MCP | Qdrant | RAG | Agentic Workflows | Prompt Engineering | Semantic Search | OpenRouter | Gemini | Ollama | Vector Databases

DevOps & Infrastructure: Docker | Docker Compose | Jenkins | GitHub Actions | Linux | Self-Hosted Infrastructure

Healthcare Domain: Healthcare Portals | Patient Engagement Platforms | RPM | CCM | PCM | Healthcare ETL Systems | HIPAA-Aware Applications

Soft Skills: Automation Strategy | Problem Solving | Technical Mentoring | Cross-Functional Collaboration | Analytical Thinking | Root Cause Analysis | Quality Leadership | Continuous Learning

ADDITIONAL INTERESTS

AI-Assisted Testing | Agentic QA Systems | MCP Ecosystem | Healthcare Technology | Flutter Application Development | Open Source Contributions | QA Architecture | Startup Building

EDUCATION

Angel College of Engineering and Technology
Bachelor of Engineering (Electronics & Communication Engineering) *2013*

S.C.M. Higher Secondary School
Higher Secondary – Mathematics & Computer Science *2009*
